Profile

Highly motivated and ambitious software developer with a strong foundation in computer engineering, information computing science, and information management and systems. Skilled game developer and successful founder/CEO, delivering innovative solutions, driving business growth, and bringing a unique perspective to software engineering through collaboration, creativity, and meticulous attention to detail.

Employment History

Game Developer, Self-employed

2022 — PRESENT

Enthusiastic game developer adeptly overcoming challenges and expanding my skillset while creating a game set for early-access this 2023.

Founder/CEO, Performer's Guild Network

2021 — PRESENT

Founder of an online-music agency that unites talented musicians for engaging online/f2f performances. Collaborating with esteemed partners, including leading financial companies in the Philippines as well as online Filipino Communities.

Music Teacher, Strums Music School, Suzhou

2019 — 2021

Taught music to students using drums, guitar, piano, and music theory. Nurturing their talents and fostering their growth, musicality, and appreciation for the art.

Musician, Self-employed

2015 — PRESENT

Captivating diverse audiences in dynamic venues such as bars, restaurants, hotels, and concert halls. Crafting memorable performances that seamlessly blend technical skill, passion, and audience engagement.

Education

Computer Engineering, Bohol University

2021

- Applied problem-solving expertise to design solutions in terminal-based menu systems, Autocad, C Language, Algorithms, and Differential Equations after 2 years of studying Computer Engineering.

Information Computing Science, XJTLU, Suzhou

2018

- Transferred to ICS from IMS driven by a growing passion for programming.
- Successfully completed a 3-year program in ICS, specializing in C#, JavaScript, and PHP.
- Developed an interactive 3D web-map of the university, serving as a library forum for campus buildings.

Information Management and Systems, XJTLU, Suzhou

2015

- Completed a 3-year IMS program, acquiring in-depth knowledge in Business Management and Software Engineering.
- Transferred to ICS to pursue a specialized focus in the tech field after recognizing a strong interest.
