Profile

As a self-starter and driven individual, I have honed my programming skills in multiple languages while also excelling in music production, recording, and digital media. With a track record of leadership roles, including founding my own network, I possess exceptional project management, communication, and conflict resolution skills.

Employment History

Game Developer, Self-employed

2022 — PRESENT

Currently working on a self-project for a game that I plan to release in 2023 for early-access.

Founder/CEO, Performer's Guild Network

2021 — PRESENT

Founder of an online-music agency that employs musicians to perform in online events. We have also raised multiple charity events with 100% of the donations going to the charities. We currently have parters with Discord Servers and Financial Companies in Philippines.

Music Teacher, Strums Music School, Suzhou

2019 — 2021

Taught Drums, Guitar, and Piano. As well as teaching music theory and performance classes.

Musician, Self-employed

2015 — PRESENT

Perform in Bars, Restaurants, Hotels, Concert Venues, etc. I am proficient in Singing, Guitar, Drums, Keyboard, and Bass.

Education

Computer Engineering, Bohol University

2021

Studied CpE for 2 years. Started from First Year due to school not accepting my transfer of credits from XJTLU. This was when I decided that I would pause my academic career in order to pursue experiences and skills that I can only learn from working as a programmer

Information Computing Science, Xi'an Jiaotong-Liverpool University, Suzhou

2018

Transfered to ICS from IMS due to increasing interest in programming.

Learned how to code in C#, JavaScript, and PHP. Built an interactive 3D web-map of the entire university that acts as a library forum for each building of the campus.

Unfortunately, due to covid, I could not renew my visa and had to transfer back to Philippines to continue my studies.

Information Management and Systems, Xi'an Jiaotong-Liverpool University, Suzhou

2015

I studied IMS for 3 years, learning about the specifics of Business Management, as well as Software Engineering before transfering to ICS to further specialize in the tech-field.
